

2018 Annual Report

Dear Friend,

As I look back over the 2018 financial year a lot has happened at World Hope International (Canada).

We completed a two-year Grand Challenges grant to provide women in rural areas of Sierra Leone, West Africa with test strips to detect urinary tract infections. We also won a grant to help combat the Online Sexual Exploitation of Children in the Philippines. We improved education opportunities around the world through child sponsorship in Haiti and Sierra Leone along with our continued flagship sponsorship program of young women at Hope House in Odessa, Ukraine.

You responded with excitement to bring clean water to those who do not have access. We drilled deep borehole wells around the world and trained 50 Canadians to operate desalination units post natural disasters. Together, we provided food to children at our First Step Centre in Ukraine and for kindergarten students in Ghana. We responded to 10 emergencies globally and empowered women in Cambodia through our Mushroom House project.

The WHI Global Alliance created the opportunity to leverage our strengths and share the vision and mission of World Hope in three countries: Canada, USA and Australia. We gave additional time to setting up the alliance which will provide quality program delivery with technical experts in 4 focus areas: Health, Environment, Human Capital and Economic Development. This enables us to achieve our goal to use market-based, community-driven enterprise solutions to empower, protect, & build resiliency.

All this could not be done without your partnership and I am very grateful to be providing Opportunity, Dignity and Hope alongside you to alleviate poverty, suffering and injustice around the world.

Thank you!

Tanya Renea Nace
Executive Director

OUR WORK

Our market-based, community driven enterprise solutions inspire hope around the world precisely because they are empowering, protecting, and building resiliency in and among vulnerable populations. When solutions like these are in place, a future not only becomes imaginable; it becomes possible--and that inspires a powerful hope.

Water and Sanitation

- Drilled **100** wells in Sierra Leone, Liberia, and Mozambique, including **1** well at a hospital, **30** wells on school grounds, and **69** community wells, impacting **70,910** beneficiaries
- Provided trainings to **99** Water Committees across the **3** countries on how to maintain wells, equipping at least **686** committee members to sustain clean water
- Constructed **6** water towers and installed **5** solar pumps, as well as toilets and showers at **4** health posts globally
- Constructed hazardous waste disposal facilities at **20** health posts, benefiting over **40,000** people

Health and Nutrition

- Conducted home visits to **5,889** pregnant women for counseling and behavior change communication to improve updates to health services
- 3,615** health care workers were trained in Helping Babies Breathe in 3 districts of Sierra Leone and **2,614** children were screened and referred for treatment for malnutrition
- Trained **1,008** Community Health Workers and **112** Peer Supervisors in Sierra Leone
- 16 malnourished children were cared for through the Alpha program in Sierra Leone and 2,614 children were screened and referred for treatment for malnutrition.
- Admitted **519** children with disabilities into the Enable the Children program and **49** family support groups were run with **161** new and **1,002** repeat attendances
- Performed **1,461** home visits and provided **227** pieces of equipment to help children improve their functional ability and performed **490** visits to children with behavioral issue

Anti-Trafficking and Gender Based Violence

- 73** social workers were trained on best practices for caring for survivors of Online Sexual Exploitation of Children in the Philippines
- 56** survivors of Online Sexual Exploitation of Children were provided with individual and/or group therapy
- 152** caregivers working at aftercare shelters were provided with specialized care-giving training in the Philippines by WHI staff
- 125** young women graduated from the Hope House program in Ukraine and **2** participants were adopted by American families this year.
- 1264** evening meals were given to children visiting the First Step Centre in Ukraine
- 120** women were offered services for domestic violence in Cambodia and **50** Cambodian men participated in support groups facilitated by WHI, to combat domestic violence

1,500 farmers benefited from GRO greenhouses in Sierra Leone, receiving **8,500** grams of seeds and harvesting **750** kg of vegetables, including cucumber, okra, watermelon and other vegetables and fruits

4,300 gallons of water were saved by small-holder farmers using the GRO greenhouse

105 households produced **110,323** kg of mushrooms in **154** mushroom houses in Cambodia

176 community members, including men, were educated and sensitized about women and girls' rights, gender equality, and sexual violence against women and children

Responded to **10** emergencies globally

Collaborated with partners to deliver **50,000** lbs of emergency supplies with **150** flights to remote communities in Florida after Hurricane Michael

Distributed emergency supplies from **740** ft-containers across **9** counties in North Carolina after Hurricane Florence

WHI worked with Amazon and close partners to supply **40** air scrubbers to hospitals and shelters during the California Wildfires

Provided safe drinking water to **350** people living in shelters following Typhoon Yutu in Saipan

50 Canadians received desalination training to provide fresh water to communities after disasters.

172 students received quality English instruction in Azerbaijan and **19** participated in conversation clubs

217 students participated in education programs including tutoring and community programs in Bosnia & Herzegovina and **38** received tailored tutoring or speech therapy sessions

207 community early childhood development workers and mother support group members trained on conducting ECD activities

370 children aged 0 – 2 years participated in early stimulation activities with their parents/caregivers at community ECD centers

600 children aged 3 – 4 years participated in play-based early learning activities

60 Kindergarten students in Ghana received a hot lunch 5 times per week.

Village Partnerships

320 households received **320** bushels of certified peanut seeds and **320** bushels of rice seeds

290 community members learned about hygiene and sanitation practices, including hand washing, safe water handling and treatment and feces management in Sierra Leone and Haiti

160 Village Development Committee members and other community members were trained on leadership skills to build their knowledge and community resources to improve the well-being of their communities

5 improved pit latrines were constructed in Sierra Leone and 8 bathrooms were completed in the Philippines

10 goats were distributed in Haiti and the Philippines as an animal multiplication project

Child Sponsorship

138 sponsors supported the Hope House program in Ukraine

Over **1,000** children in Sierra Leone received school supplies and 1 digital “classroom in a box” donated for a partner school in Haiti

109 graduates from our Child Sponsorship programs globally!

100 individuals involved in Parent Teacher Association (PTA) and School Management Committee (SMC) in the Philippines learned about child protection/ child safeguarding to strengthen their roles as duty bearers

2 new sponsorship sites in Haiti and **5** new sponsorship sites in Sierra Leone through Village Partnerships

Meet CC-Mean, a woman in Cambodia who decided to invest in mushrooms through our Sister Community Development Program, better known as our Thera Metrey Mushroom Cultivation project. This is her story...

“I got married when I was 19. Since we got married, our income came from rice farming. During the break time from farming my husband use to leave the house to do cutting woods in the forest in another province far from home. **He stayed in that province for about a month or so then would come back home for few days then he would leave us again to cut the forest.**”

“There was a time when my husband was cheated by the employer and he came home without any money received as payment for his forest work. He also felt unsafe in that situation because his work was illegal. When my husband was not around it was so difficult for me some time, I felt afraid and unsafe alone with our children. I have three sons and one daughter. Youngest son is 16, study in grade 10.”

“My biggest hope on this mushroom growing is having a market to sell and I can have reliable and regular income.”

“When my husband was away from home, I felt so worried. I was afraid of his safety or that he might get sick of malaria due to cutting down trees.”

“I started my first mushroom house in January 2017. **I decided to invest in growing mushroom.** It was just like taking a big step for my family. Our family was so worried we might end up losing our money if mushroom production is not good.

However, my mushroom production has been running well since we had our first harvest. I started my second mushroom house in mid-2018. Now I have two mushroom houses.” “Growing mushrooms can earn fast money. Our family can rely on this income to pay for our loan

My husband has stopped going to work in the forest outside our village. The money we earned from mushroom, we have used to buy more land for rice farming. We also have paid for the cost of drilling our own well so we have water at home and for our mushroom. I paid for our house renovation, paid for my son’s educational expenses, and all our daily expenses are covered by our sales from mushroom. Our plan is to keep extending more mushroom houses.

"I have seen that my community has changed a lot, people in my village can have better family livelihood, even non-mushroom grower can also earn money from selling raw materials."

“We are happier now than before because my whole family can live together, my husband can work at home and no need to go to the forest.”

“Through this mushroom trade, I have seen that my community has changed a lot, people in my village can have better family livelihood, even non-mushroom grower can also earn money from selling raw materials. There are now more shops and small businesses in my village because people here can afford to buy more things or goods or foodstuff for their families.”

“People in our area have recently started to come back home from other provinces because they can now have work in our community and can earn money while being at their homes.”

“My biggest hope on this mushroom growing is having a market to sell and I can have reliable and regular income.”

2018 CONSOLIDATED FINANCIAL SUMMARY

World Hope International (Canada) is a registered charity (charitable #86950 0173 RR001) committed to maintaining the highest standards of fiscal responsibility, accountability, and transparency. The complete audited financial statements are available at www.worldhope.ca
